Ditch your IVR/IWR for

U.S. Patent # 5,431,299 ; other patents pending

-  **Lower Cost Alternative** to decentralized IVR/IWR-based treatment control technology.
-  **Adaptive Trials** support combines change-orders elasticity with 360° accountability.
-  **Open Software Architecture** ensures complete interfacing with any CTMS.
-  **Superior Inventory Management** at point-of-care eliminates out-dating and controls costs.
-  **Innovative Rescue Dose & Emergency Med Access** enhances the clinical environment.
-  **Neural-Based Forecasting** optimizes stock levels and ensures uninterrupted supplies.
-  **Adaptable Capacity** storage for high-throughput trial supply management.
-  **Full Visibility of Chain of Custody** for investigational medicinal product.
-  **Enhanced Regulatory Compliance** and reduced audit findings through earlier identification/resolution of discrepancies.
